Get ready to explore the hottest topics in plastic surgery, dermatology & aesthetic science in 3 days.

CARTAGENA
COLOMBIA - AUGUST 1 TO 3

WITH THE ACADEMIC COLLABORATION OF AsoColDerma
After its incredible experience of 2018, IMCAS returns to Cartagena de Indias with three times the charm for the 3rd edition of IMCAS Americas.

This year’s program amounts to 80 scientific sessions presented in engaging learning formats guaranteed to enhance your practical knowledge and skills in dermatology, plastic surgery and aesthetic science.

Each of the three congress days presents a full-day LIVE event: a series of minimally-invasive live demonstrations on Thursday; non-stop dissections during the Anatomy on Cadaver Workshop on Friday; concluding with a one-day live surgery course on Saturday.

IMCAS Americas is also the ideal place to discover the latest products on the market. Take a stroll through the exhibition hall and attend the symposia to see the demonstrations and activities prepared by leaders of the industry.

The Networking Cocktail, the Gala Dinner and the Noche Colombiana dinner offer excellent opportunities to socialize in an intimate but open atmosphere so that attendees may exchange and discuss on a more personal level with the speakers, fellow delegates and industry representatives.

IMCAS Americas 2019 promises top quality science at the heart of beauty, giving rise to a unique educational experience that fills the mind and pleases the senses.

Welcome to beautiful Cartagena de Indias.
MEET THE FACULTY

ASSOCIATE COURSE COORDINATORS
CARTIER Hugues, Dermatologist, France
GARCIA Sebastien, Plastic surgeon, France

COURSE COORDINATORS
ASCHER Bergeras, Plastic surgeon, France
CONDO Stevens, Plastic surgeon, France
FRANCO Manuela Dias, Dermatologist, Colombia
ROIGSAL Frank, Facial plastic surgeon, Mexico

SECRETARY COUNCIL

HEIKES EITIS, Alminda Ernesta, Plastic Surgeons, Columbia
HERNANDEZ MOEDAS, Fernando, Dermatologist, United States
RAUWENHOEK, Sergio, Dermatologist, Brazil
LEWIS, Lloyd, Plastic surgeon, United States
BROWN, Sandy, Plastic surgeon, United States
HORAK, Laszlo, Plastic surgeon, Austria
LEMAIRE, Anne Marie, Plastic surgeon, France
LISBERG, Sarah H, Gynaecologist, United States
LEHANN, Sophia, Plastic surgeon, France
LEWIS, Sandy, Plastic surgeon, United States
LIN, Xing, Dermatologist, Taiwan
LOUGHE RICHARDS, Anna, Dermatologist, United States
POISSON, Peter, Plastic surgeon, France
SMITH, MV, Plastic surgeon, United States

THE “BOTTOM” LINE

• Use a short line from the gravity line to the costal margin to approximately define the inferior border of the abdomen. This is your “tent line” and is the guideline for where the dissection will be performed.

• Avoid dissecting in the “risk zone” immediately deep to the rectus sheath.

• Avoid deep dissection in the hypogastrium.

• Ensure that patients are hydrated adequately prior to undergoing any surgical procedure.

• Ensure hydration and oxygenation during the perioperative period to avoid hypovolemia and hypothermia.

• Use access incisions that best suit each patient instead of making the incision for access purposes only.

• Be sure to minimize blood loss and fluid extravasation via ligation of key vessels.

• Perform the dissection in a plane that will avoid injury to nearby structures.

• Be sure to avoid dissection near the rectus sheath to avoid injury to the neurovascular bundles.

• Use aseptic techniques that have been carefully monitored and validated.

• Use sedation techniques that are appropriate for your patient population.

• The risk of death should be discussed with the patient prior to proceeding.

THE ANATOMY

The decision to perform a deep fat injection procedure must be made with the awareness that the deep structures of the buttocks have a complex multi-layered structure. These layers have a very important role in the rehabilitation and prevention of complications. Our understanding of the deep layers of the buttocks is essential to identify all the critical structures that need to be respected during fat injection. The deep fat is injected between the muscle and the fascia of the gluteus maximus.

An important factor is the presence of a network of arteries and nerves. These structures are found throughout the muscle and can be reached at all levels of the buttocks. The inferior vascular system is quite strong, and the fat injection procedure is performed at the deep subcutaneous level, just above the fascia of the gluteus maximus.

The problem occurs when the fat is injected past the fascia of the gluteus maximus. The presence of free fatty acids may cause the formation of free radicals, which can damage the vascular system and lead to complications. Therefore, it is crucial to inject the fat at the correct depth to avoid damaging the vascular system and causing complications.

The decision on whether to proceed with buttocks fat grafting should be based on the patient’s wishes, the availability of fat, and the surgeon’s experience. It is essential to communicate with the patient about the potential risks and outcomes of the procedure. The patient should be informed about the possibility of complications and the need for follow-up care.

The goal is to understand that the fat used for fat injection procedures is injected into the deep subcutaneous layer, below the dermis, to improve fat integration while avoiding complications. It is crucial to perform a risk assessment before proceeding with any fat injection procedure. The role of the surgeon is to ensure that the fat is injected in a safe and controlled manner, minimizing the risk of complications.

The bottom line is to ensure that the fat injection procedure is performed in a safe and controlled manner, avoiding complications and ensuring the best possible outcomes for the patient.

The ultimate goal of IMCAS congresses is the collective progress in all fields of aesthetic science through the exchange and cooperation. The standards to maintain the high-quality scientific level are further bolstered by a network of Scientific societies around the world. The collaborations have the mutual aim of nourishing each other’s influence and outreach in plastic surgery, dermatology and aesthetic science, so that our progress forward is always in the direction that benefits all disciplines.

IMCAS strives for constant excellence in scientific content, therefore all sessions of our congresses comply with the conflict of interest policy, and must disclose any potential influences that may bias the content.

Updated list on IMCAS.com

Scientific Sessions

Scientific Courses

In Attractive Formats

The key themes are presented through dynamic and stimulating formats to ensure that you retain the maximum from each session. Watch as speakers battle to defend their preferred methodology on a given topic, or delve deeper into a major topic during focus sessions. For those who prefer more action, the interactive workshops and patient demonstrations allow you to see the speakers perform in real-time.

The IMCAS alert complications sessions present problematics based on real complications and difficult cases from practices with analysis and solutions from the experts. Are you an investigative learner? Plunge into deeper examination of a targeted problematic during the target courses. More into visual materials? The video courses introduce short video trainings that focus on applied techniques on a theme of your choice.

THE LEARNING OBJECTIVES OF IMCAS CONGRESSES

- Identify the important advances in treatments or intervention methods for each specialty.
- Evaluate the implications of recent studies and research in various areas of aesthetic science.
- Analyze the significance of technological advancements and new innovations.

LIVE DEMONSTRATIONS ON THURSDAY

These sponsored activities where company affiliated experts perform treatment procedures on live patients allow you to see the products and devices in action right before your eyes. The live demonstrations are first of the three daily live events waiting for you during the congress. Be sure to attend the back-to-back treatment performances, starting off with filters, toxins and fillers, followed by threads, and concluding with demonstrations using lasers & EBD.

LATAM - EURO LIVE SURGERY ON SATURDAY

IMCAS Surgery sessions are designed specifically to provide practical training to improve the depth and breadth of your surgical skills. The best of the best in plastic surgery perform the procedures in real-time so you can follow along as they go over the most controversial and trickiest surgical topics in recent years: liposculpture, body contouring, face and breast surgery, as well as safety protocols for pre and post operations. The live surgery performances are accompanied by cadaver dissections so that you can see the surgery and the anatomical region it concerns all in one course.

The LATAM - EURO day is supported by worldwide surgical scientific societies who will evidence the specificities of the practice by continent.

ANATOMY ON CADAVER WORKSHOP ON FRIDAY

It is popular for a reason: you get three trainings in one session. The renowned surgeons and speakers of the cadaver sessions take you on an educational adventure where you explore the techniques, the anatomy and concrete cases so that you can perfect not only your proficiency with injectables for the periorbital, nasolabial, lower face but also the genital area. This is the perfect opportunity to show your anatomical references and gain a visual understanding of "what lies beneath," so that you apply the most effective techniques to the right areas and avoid the danger zones.

GENITAL TREATMENTS ON THURSDAY

Whether the demand is for functional or aesthetic corrections, it's important to know your intervention methods to deliver the results your patients desire. This intimate module, led by prominent physicians in the field, explores the surgical and non-surgical treatment procedures. Open to gynecologists and physicians alike, this all-encompassing course is designed for both male and female treatments, covering various intervention methods with injectables & new technologies, indications, contraindications, along with the opportunity to examine the genital anatomy of both genders.

MALE TREATMENTS ON SATURDAY

To address the growing number of male patients in recent years, and to help you deliver the desired results to your male patients, this expert speakers module this talk you step-by-step from head to toe on how to perfect the various procedures for men's face and body treatments:

CLINICAL DERMATOLOGY ON SATURDAY

The Clinical Dermatology module aims to perfect your knowledge in the diagnosis and treatment methods for common skin diseases so that you upgrade your dermatologic proficiency with updates that are tried and true.

International dermatologists present their clinical studies in the examination, prevention and intervention on dermatological pathologies such as melasma, pigmentation diseases, acne, acne, psoriasis and hyperhidrosis, with a special emphasis on the session dedicated to treating colored skin. This is a unique opportunity to receive tailored tips and tricks from experienced specialists that are concrete and applicable.

REGENERATIVE MEDICINE ON FRIDAY

This interdisciplinary module presents the growing importance of regenerative surgery and cell therapy. This module aims to help practitioners develop the methods of approach and skills required to master procedures and better incorporate them into practice. The experts cover the latest developments and evidence in research on PRPs, cell therapy and lipofilling, as well as in-depth treatment techniques for the most balanced and natural results.

PRACTICE MANAGEMENT ON FRIDAY

In the modern era of social media and digital marketing, being a great physician entails not only having the medical competencies, but also the techniques for surviving in this New Age market.

The sessions also tackle important questions that may arise in your practice: How can I react in case of a malpractice? How can I make sure my patients keep coming back? Attend these lectures and get the answers you need!

LASERS & EBD ON THURSDAY & FRIDAY

The sessions on lasers & EBD are designed to demonstrate the diverse ways the latest devices are used for aesthetic procedures: liposculpture, skin tightening, vascular complications and hair removal. For the full effects of the devices, be sure to attend the live demonstrations where procedures are done on real patients to show you real results.

threads on all 3-days

Threads and suspending devices are great options or complementary treatment methods for rejuvenation. Find a session each day for the various application of threads, starting from the brow, upper face, lower face and neck, followed by detailed coverage of complication cases during the IMCAS Alert session. To see the latest products in action, the live demonstrations allow you to watch the procedures performed on patients and see the results for yourself.

Don’t take our word for it*

“We excelente preparación, logística, gran variedad de temas con diferentes opiniones y buena muestra de complicaciones y solución de casos.”

Gino Anna Grosso, Dermatologist, Italy

“Quiero agradecer la posibilidad por haber permitido participar de este evento, me pareció muy bien preparado para los participantes. Un gran éxito!”

Martha De La Rasa Morales, Dermatologist, Colombia

“Muy bien el programa científico y la información de temas con diferentes opiniones y buena muestra de complicaciones y solución de casos”

Gina Anna Grosso, Dermatologist, Italy

* Feedback from IMCAS Americas 2018
With our patent on helical cog design, MINT is able to give stronger holding strength for facial tissue approximation. MINT is a specialized item than flat cog design.
PLACES WE LOVE TO VISIT

CASTLE OF SAINT PHILIPPE OF BARAJAS – You cannot visit Cartagena without making a trip up to this huge castle which peers over the city. Stroll through the battlements, weave your way through underground passages and admire the impressive architecture.

PLAYA BLANCA, BARU ISLAND – Undoubtedly one of Colombia’s most beautiful beaches with crystal clear waters and perfectly white sand. Only 45min by boat from the Cartagena port.

HEREDIA THEATER – Built on the ruins of the old Church of La Merced (1625) to commemorate the Centennial of Independence in 1911, this historical theater was then restored as a cultural center of performing and musical arts.

CASA CHIQUI – Make sure to visit this restored 1930s warehouse, described by Vogue as Cartagena’s “most dazzling store.” Stocked with beautiful items from all over the world, you can be sure to walk away with some unique furniture and accessories.

WHERE TO UNWIND

CAFÉ DEL MAR – The best spot to watch the sunset in Cartagena while sipping a nice cocktail.

ALQUIMICO – A must stop to enjoy delicious drinks in this local central bar with a cosmopolitan feel.

CAFÉ HAVANA – The most famous bar in Cartagena, all about the sizzling Cuban vibes.

OUR MEALTIME FAVORITES

MAREA BY RAUSCH – Located at the Convention Center, this restaurant is an immersive experience for the senses with a stunning panoramic view of the walled city.

EL GOBERNADOR BY RAUSCH – One of the few true high-end dining options in the city serving traditional local cuisine with a European flair.

MISTURA CARTAGENA – A sought after open air restaurant with ceviche fusion and live music.

CARTAGENA DE INDIAS WAS RECOGNIZED BY UNESCO FOR ITS REMARKABLE HISTORIC VALUE IN 1984. THIS FASCINATING CARIBBEAN DESTINATION IS THE GATEWAY TO THE AMERICAS AND THE MOST BEAUTIFUL AND INTERNATIONAL OF COLOMBIAN CITIES.

THE ALL INCLUSIVE PASS + HOTEL

Book your hotel directly through the IMCAS website and benefit from our special reservation rates. Have you heard of our all-in-one option? Get our “All Inclusive Pass + Hotel” package so that you get all the congress and hotel advantages at once.

PACKAGE INCLUDES:
- Physician badge, optional courses, IMCAS Academy, VIP Lounge, Gala Dinner and 3-night accommodation
- THE HOTEL CHARLESTON SANTA TERESA

BOOK AT WWW.IMCAS.COM

For any queries: registration@imcas.com

GALA DINNER & AFTER PARTY

Join us for an amazing night at the Hotel Charleston Santa Teresa on Friday, August 2 at 8 PM. Reserve your seat ahead of time for 150 USD

UNA NOCHE COLOMBIANA

Let us whisk you away on a unique dining experience! Step outside the ordinary and exchange with other guests in a friendly exotic atmosphere.

Saturday, August 3 at 8 PM
Reserve your seat online for 120 USD
WHERE TO GO THIS UPCOMING SEASON?

Whether it’s escaping to Bali, exploring Cartagena de Indias, coming to Paris, or learning from your private plane, IMCAS knows the route to the leading subjects in plastic surgery, dermatology and aesthetic science. Simply follow your needle and your scalpel...
