EXHIBITOR GUIDE

The leading subjects on dermatology, plastic surgery and aesthetic science

CELEBRATING EXCELLENCE
20 YEARS LATER, 20 YEARS YOUNGER
Dear Colleagues,

What started in Paris 20 years ago, as a small group of physicians sharing their ideas on aesthetic science, has evolved into leading international multi-specialty congresses at the interface of plastic surgery and dermatology.

We have gone from strength to strength and around the world, all while keeping our original French touch.

Expansion
Over the last two decades, IMCAS has been continually expanding and innovating. Ten years ago we introduced our inaugural IMCAS Asia, which took place in Thailand. Since then, we have taken this congress around Asia, with congresses in Hong Kong, Singapore, Indonesia and Taipei as well as India, China and most recently Americas.

We may travel throughout the globe every year but our home is in Paris. IMCAS Annual World Congress is our landmark event and one of the most important congresses in the aesthetic science calendar. IMCAS 2018 will be a particularly special homecoming, as we will be celebrating our 20th anniversary.

Innovation
Our expansion has not only been geographical; we have also moved into new teaching areas and introduced innovative formats, including debates; clinical case studies; live demonstrations; round table product analysis; and full day modules, allowing participants to immerse themselves in a one of our up-to-the-minute subjects. This year you can check out our latest additions, Target Courses and Video Classes.

Over the years we have also kept up-to-date with the latest technology, offering IMCAS Live, a live feed that enables congress attendees to instantly interact with each other; and mobile-friendly websites, meaning programs, maps and speaker data can be instantly accessed while moving around our congresses; and an e-learning platform.

Celebration
In 2018, we aim to break all our previous records, with 8000 attendees, 600 expert speakers and 250 exhibiting companies.

We have created a rich scientific program, delving deep into the hottest topics in the medical aesthetic field, and packed it into 270 learning hours over three days, to ensure you can make the most of your time in Paris.

In keeping with tradition, we will get the congress off to a flying start with our famous full-day Anatomy on Cadaver Workshop. Simultaneously discovering the anatomy behind each part of the face and body while witnessing the practical application of treatments on patients.

Other highlights will include entire days dedicated to face, body and breast surgery, and the special anniversary sessions, where we trace the history of selected treatments over the last two decades. As an international organization, we are also excited about our Middle East, Eastern European and Chinese Masterclasses, where renown experts will lead the discussion on regional differences, to ensure attendees come away with a deeper knowledge of the trends and markets in these regions.

Of course, with so many sessions to choose from, it will not be possible to attend all the ones that interest you, which is why we have developed the IMCAS Academy. IMCAS Academy’s approach of offering aesthetic learning anytime, anywhere has been an instant success and it is now the go-to reference for medical aesthetic information.

Its community, with over 10,000 members, is constantly growing. We are confident that IMCAS Academy will continue to attract practitioners from all over the world wishing to deepen their knowledge.

As much as we expand, and as many innovations and advances we implement, we are still as young as ever, eager to keep growing and improving. Join us as we celebrate two decades of excellence in aesthetic science, and look together towards the next steps.

Dr Benjamin Ascher
Plastic surgeon, France
Founder and Scientific Director of IMCAS
